

# SRA Client Updates

## Upgrading from Network Connect to Pulse 5.2.6

### Introduction

The following process will upgrade Simplified Remote Access users connecting with Network Connect to the Pulse 5.2.6 client. It should be noted the installation of the Pulse client will leave Network Connect unchanged during this process and will remain on the user machine until the user chooses to uninstall the application.

### Considerations

Administrative privileges are required on workstation to make changes to Simplified Remote Access software. In the event the user does not have elevated privileges the Juniper Installer Service can be installed by an administrator. The Juniper Installer Service will allow future software upgrades to occur without the need of administrative privileges.

The Juniper Installer Service can be downloaded from:  
<http://juniperinstaller.hcahealthcare.com>

Department of Service Management & Delivery

Juniper SSL Installer Service

Click the Download below. To be installed by an account with admin rights on the workstation.  
Once installed, Secure Application Manager will be installed without the aid of an administrator.
