Oncology Nurse Navigators

St. David’s Healthcare offers oncology patient navigation services to provide comprehensive cancer care in the Austin area. The goal of the oncology nurse navigator is to improve the cancer experience for each patient from diagnosis through survivorship. As a consistent point of contact for the patient, a Nurse Navigator assists to:

- Reinforce patient education regarding disease processes, treatment options, and clinical trial availability
- Coordinate patient care services across medical disciplines to streamline cancer care delivery
- Facilitate communication between all members of healthcare team
- Organize multidisciplinary team conferences to promote collaboration in cancer treatment
- Serve as an ongoing source of support for patients and are reliable to answer ongoing questions
- Help decrease barriers to care by assessing needs and linking patients with community resources
